# 1. Introduction:

ICTDialer is a unified communications dialing software which features automatic dialing, mass communication, CRM integration and computer telephony integration developed over Free-switch, ICTCore communications framework and angular framework and supports a variety of business scenarios based on Voice, SMS and Fax communications technologies. It empowers you to market your products and services and interact with your customers with ease and efficiency.

**Following are ICTDialer features:**

- Support SMS Marketing Campaign
- Support Fax Marketing Campaign
- Support Email Marketing Campaign
- Support Voice Message campaign

## 2. System Requirements:

To install ICTDialer you need following system requirements:

### 2.1. Server Specs:

- Quad Core 3.0 GHZ
- RAM 4GB
- Hard Disk 500GB

### 2.2. Operating System:

- Centos 7.X

## 3. Installation Guide:

Complete installation guide page is [here](#):

## 4. Signing In:

To start the application visit the link, a window will appear and it will ask for the user name and password. Fill the required fields to **sign in**.

### 4.1. Login:

- Visit the project **url**:
- Enter login and password
- Click on “**Login**” button

**Sign In**

Email address:

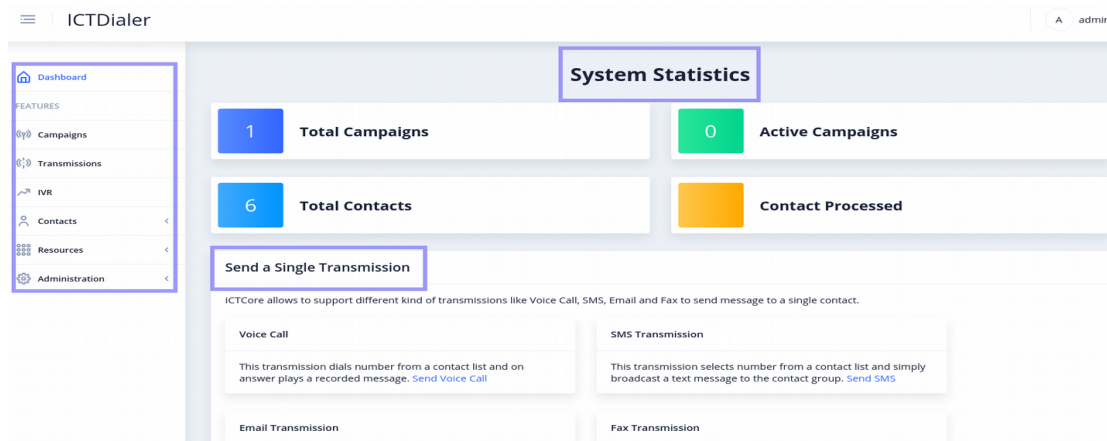

Password:

☐ Remember me [Forgot Password?](#)

SIGN IN

## 5. Dashboard:

Once you have logged in successfully it will redirect you to dashboard/home page. Manage all contacts, texts, voice recording, send fax, send call and much more features.

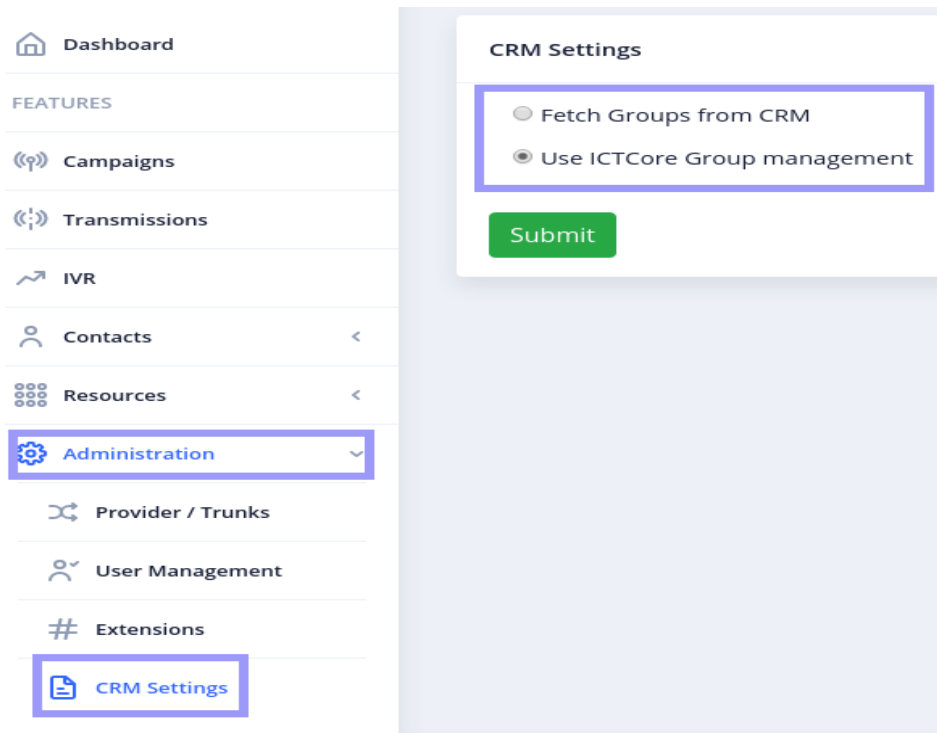

## 6. Setup/Configuration:

### 6.1. Add Contacts:

ICTDialer provide two modes to add contacts in system:

- Independent Mode (To use ICTDialer contacts)
- CRM Integration (To fetch contacts from CRM)

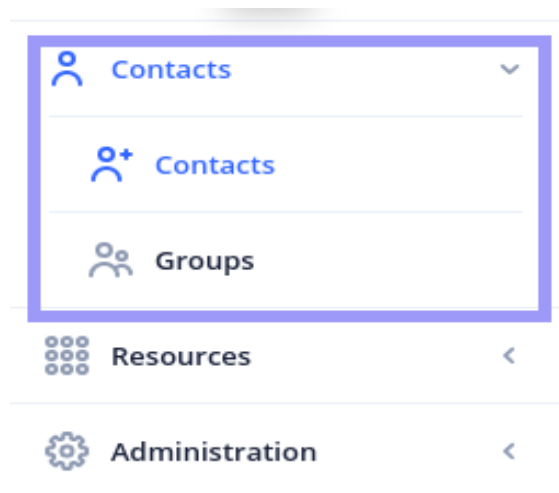

To select mode contacts CRM integration, click on **administration**, it will a open CRM settings window, select required option and click on “submit” button.

Click on **contacts** menu to manage your contacts.

There will be options:

1. Contacts
2. Groups

## 6.2. Contacts:

Click on “**Contacts**” sub-menu, a list of contacts will appear. Here you can manage all of your contacts.

Click on “**pencil**” icon against the contact name in the list, you can “update” contact information. To remove contact name from list, click on “**delete**” icon.

## 6.3. Contact Groups:

### 6.3.1 Groups:

ICTDialer provides a contact group feature. You can use group service if you want to send SMS, email, fax and voice message to a group of people.

Click on “**Groups**” sub-menu, a list of contact groups will appear on web-page. Here you can manage all of your contacts.

1. To download sample CSV file, click on “sample CSV file” button to save the file.
2. Click on “pencil” icon to update groups information.
3. Click on “down arrow” button to download contact group.
4. To remove contact group from list, click on “delete” icon.

### 6.3.2. Add New Contact Groups:

Click on “**Add Group**” button on the contact list page, it will lead you to the window form. Fill the required fields by entering:

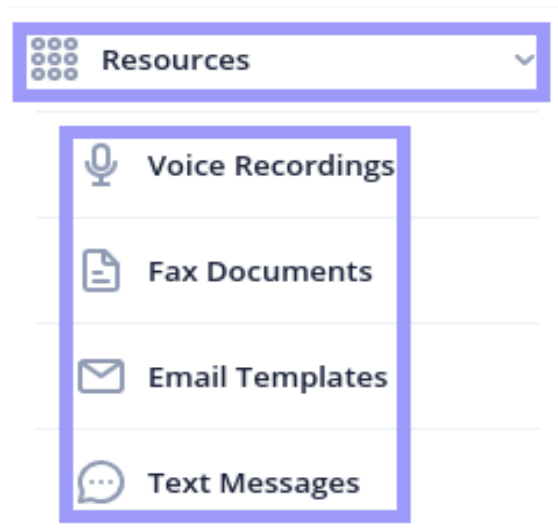

1. Group Name: Type group name in text-box
2. To upload CSV file: Click on “choose file” select file from device.
3. Description: Type additional remarks/description in text-box

Click on “submit” button, a new contact group will be created.

The screenshot shows the 'Add::Group' form. It has a title 'Add::Group' at the top. Below the title are three main sections: 'Group Name' with a text input field labeled 'Name:' and placeholder 'Group Name'; 'Upload CSV file' with a 'Choose File' button and the text 'No file chosen'; and 'Description' with a text input field labeled 'Description:' and placeholder 'Any additional Remarks/Description'. At the bottom of the form is a green 'Submit' button.

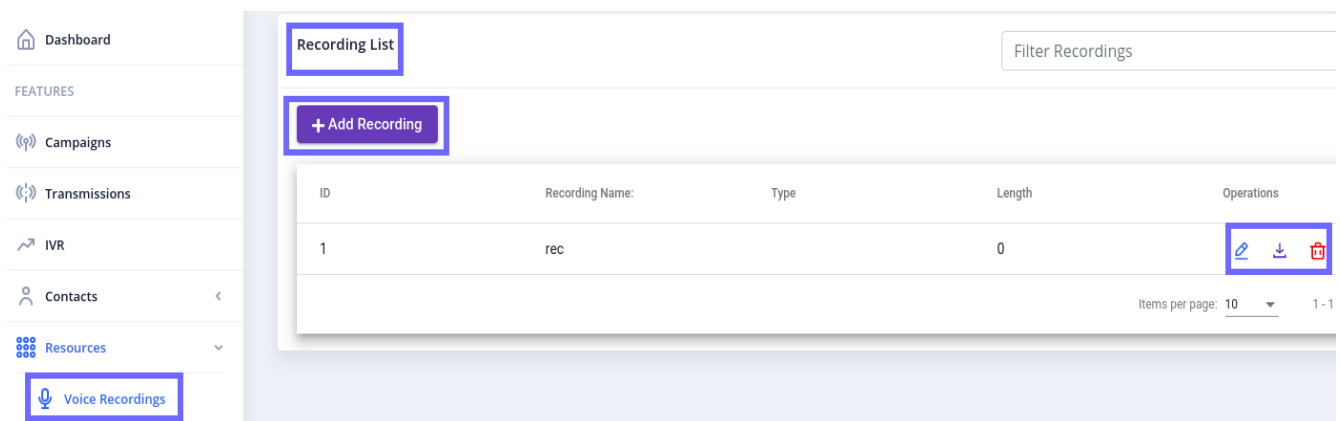

## 6.4. ADD Resources:

Click on 'Resources' from the main menu, and the following resource-related sub-menus are listed. When users need to build a campaign, these resources will be used. Following resources are:

### 6.4.1. Voice Recordings:

Click on “Voice Recordings” sub-menu, a list of voice recording and details will appear on web-page.  
Click on “pencil” icon to update information.  
Click on “down arrow” button to download recording.  
Click on “delete” icon to remove recordings from list.

### 6.4.2. To Add New Recording:

Click on “**Add Recording**” button on the recording list page, it will lead you to the window form. Fill the required fields by entering:

1. Recording information: Type recording name in text-box
2. To upload recording file: Click on “choose file” select file from device.
3. Description: Type additional remarks/description in text-box

Click on “submit” button, a new recording file will be added in list.

#### 6.4.4. To Add New Fax Document:

Click on “**Add Document**” button on the document list page, it will lead you to the window form. Fill the required fields by entering:

1. Document information: Type document name in text-box
2. To upload PDF file: Click on “choose file” select file from device.
3. Select fax quality from drop-down list.
4. Description: Type additional remarks/description in text-box

Click on “submit” button, a new fax document will be added in list.

The screenshot shows a form titled "Add Document" with a light blue header. The form is divided into four sections: "Document Information" with a "Document Name:" text box; "Upload Document (pdf, png, tiff and jpeg are supported only)" with a "Choose Files" button and "No file chosen" text; "Fax Quality Type" with a "Quality Type:" dropdown menu set to "Standard"; and "Description" with a "Description:" text box.

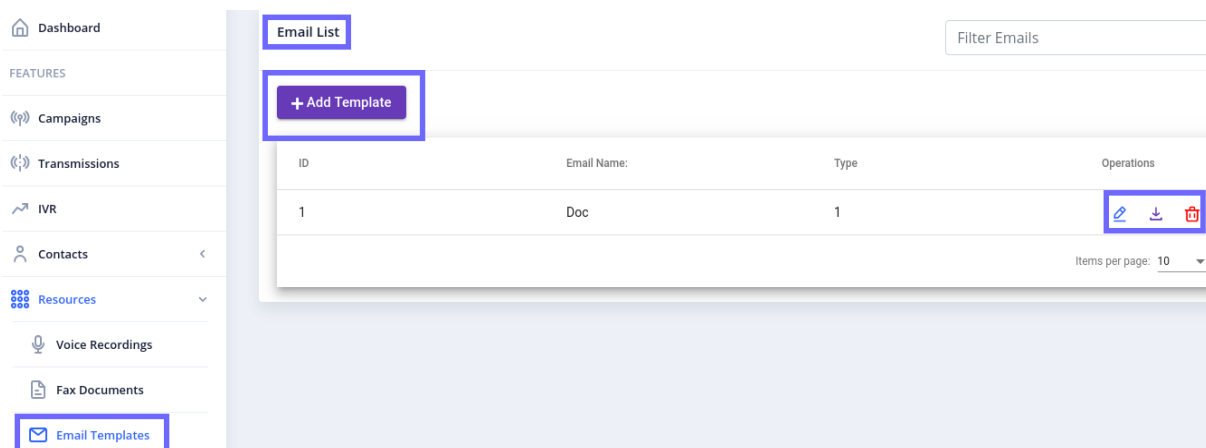

#### 6.4.5. Email Template:

Click on “Email Template” sub-menu, a list of email templates and details will appear on web-page.

Click on “pencil” icon to update information in email templates.

Click on “down arrow” button to download email template.

Click on “delete” icon to remove the specified template from list.

The screenshot shows a web application interface. On the left is a sidebar with a menu including "Dashboard", "FEATURES", "Campaigns", "Transmissions", "IVR", "Contacts", "Resources", "Voice Recordings", "Fax Documents", and "Email Templates" (which is highlighted with a blue box). The main content area is titled "Email List" and has a "Filter Emails" input field. Below the title is a "+ Add Template" button. A table lists email templates with columns for ID, Email Name, Type, and Operations. The first row shows ID 1, Email Name "Doc", Type 1, and three icons in the Operations column: a pencil, a download arrow, and a delete trash can (all three icons are highlighted with a blue box). At the bottom right of the table, it says "Items per page: 10" with a dropdown arrow.

ID	Email Name	Type	Operations
1	Doc	1	  

## 6.4.6. To Add New Email Template:

Click on “**Add Template**” button on the email list page, it will lead you to the window form.  
Fill the required fields by entering:

1. Email information: Type document name in text-box.
2. Type email subject and message in text-box.
3. Type plain message: Alternate text message in text-box.
4. To upload template attachment: Click on “choose file” select file from device.
5. Description: Type additional remarks/description in text-box

Click on “submit” button, a new template will be added in list.
